Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glatkowski et al in view of Asakawa et al.

Glatkowski et al discloses a method of depositing nano-particles on objects including the steps of forming a nano-particle dispersion comprising: providing a polymer comprising an acrylate (para 0108), providing a metal component (para 0039), providing a carrier (para 0053). The resultant nano-particle dispersion comprises nano-particles having a mean average diameter of about 10 nm or less. The dispersion further comprises an UV stabilizer (para 0067).

Glatkowski et al does not disclose coating a micro-structured object having features formed thereon, wherein each of the features have a dimension of between 50 nm and 200 microns with the nano-particle dispersion forming a nano-composite.

Asakawa et al discloses coating a micro-structured object having features formed thereon, wherein each of the features have a dimension of between 50 nm and 200 microns (para 0001).

Art Unit: 1762

It would have been obvious to one with ordinary skill in the art to include coating a micro-structured object having features formed thereon, wherein each of the features have a dimension of between 50 nm and 200 microns because Asakawa et al teaches need in the electronics art for micro-structured objects (para 0002).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alain L. Bashore whose telephone number is 571-272-6739. The examiner can normally be reached on about 7:30 am to 5:00 pm (Mon. thru Thurs.).
